DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- I. Projections with optical material on the projections [Fig. 8].
- II. Projections with optical material between them [Fig. 4].
- III. Recesses with optical material in the recesses [Fig. 10].
- IV. Neither projections nor recesses; optical material localized by repellency/hydrophilicity only [Fig. 11].
- V. Neither projections nor recesses nor repellency/hydrophilicity; optical material localized by a electric potential [Figs. 12 and 13].

2. Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include

Art Unit: 2871

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

3. The claims are deemed to correspond to the species listed above in the following manner:

- I. Claims 1, 56, 58, 72, 76-81, and 91.
- II. Claim 64.
- III. Claim 3.
- IV. None
- V. None

The following claim(s) are generic to species I and II: claims 4, 51, and 85. The remaining claims are generic to species I, II, and III.

4. Claim Interpretation Question: The examiner notes that many of the claims recite “applying ... to the surface where the projections are formed” or “applying ... to the surface at the predetermined positions”. Are these phrases “where ...” and “at ...” meant indicate where on the substrate the optical material goes or is this meant to be left unspecified? Certain claims, like 60, 61, 93, 95, and 96, refer to “predetermined positions” rather than “the predetermined positions” or “said predetermined positions”. Are these the same predetermined positions that are previously mentioned, and is the

Art Unit: 2871

language intended to limit where on the substrate the optical material is placed, or is it intended only to limit it to being placed on the substrate?

5. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the concept generic to all the species, that is, localizing an optical material using features on a display substrate, does not constitute a single general inventive concept, as evidenced by *Yuichi*, Japanese Patent Document No. 06-281917.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
